

PRESS RELEASE

Supercede named as one of FUTURE50 Europe

LONDON, 27 September 2021 – Chosen among thousands of contenders, Supercede has been named on the @Insurtech Insights #Future50 Europe - the industry's definitive ranking of the early stage insurtech startups shaping the insurance landscape in Europe.

This award is a culmination of months of work researching and rating the most impressive insurtechs in the industry. Thousands of insurtechs were whittled down to a shortlist of over 300 before the final Future50 were selected by a panel of over 20 C-level judges.

Future50 is the world's most credible ranking of up-and-coming insurtechs. See us featured and the full Future50 [here](#).

1. About Supercede - www.supercede.com

Supercede, the provider of a global reinsurance placement platform built for dealmakers, manages the complete placement lifecycle for the largest independent global network of reinsurance professionals, worldwide. It captures actuarial-grade submission data with Supercede Analytics and enables users to trade without cost on one intuitive placement platform.

For cedents: previously, data preparation was a hugely complex and time-consuming process. Now Supercede's Analytics solution automates the creation of outwards reinsurance submission exhibits, including the preparation, validation, and cleansing of data, premium estimates, rate changes, bordereau, loss runs, and triangles, which they can then share selectively with brokers.

For brokers: currently, many brokers spend time on compiling data rather than doing the deal. With Supercede they get clean and consistent outwards data from cedents to build data-rich, multi-layer risk profiles with customisable, reinsurance-specific features that they can then share with selected markets for quoting and binding, or distribute to a wider global marketplace of underwriters.

For reinsurers: historically, reinsurers had to wait for 'friendly brokers' to bring them the best business and navigate multiple broker systems or an overflowing inbox to find submissions. Now they get access to a world of new risks across multiple brokers in a single platform, with risks represented consistently with the data needed to price at their fingertips.
